About RAA AOL Clean Hand Rub

RAA AOL Clean Hand Rub is an Instant Drying Hand Disinfecting agent. It delivers instant actions against bacterial organism which makes it instantly effective, gentle, and an easy to use product. It is infused with the superior [SILVER Ion technology](#) synergized in Hydrogen peroxide in addition to the high concentration of Alcohol. The [SILVER Ion technology](#) gives it the unique and one of a kind ability to act as a controller against H1N1 and Tuberculosis Bacteria.

When soap and water are not readily available, RAA AOL Clean Hand Rub is the most effective cleansing agent. Due to its ready to go packaging, it can be used for disinfecting during travels, shopping, schools or even at home. RAA AOL's [SILVER Ion technology](#) makes it the most effective instant disinfecting agent.

Why is it so Important and Effective?

RAA AOL Clean Hand Rub is made of 3 essential Ingredients:-

- [SILVER Ion technology](#)
- Hydrogen Peroxide
- Alcohol

RAA AOL Clean Hand Rub employs not 1, not 2 but a 3 Phase disinfecting sequence

Phase 1: - The Alcohol destroys the outer layer of the bacterial cell.

Phase 2:- The oxidation of the Hydrogen Peroxide liberated a Single Oxygen Molecule. The liberated oxygen is proven worldwide to impart disinfecting properties.

Phase 3:- The [SILVER Ion technology](#), interrupts the DNA Strand of the bacteria, which stops the metabolism and multiplication of the bacteria cells.

How to use?

Areas of Application

The unique [SILVER Ion technology](#) does not stop at cleansing hands. The specially engineered [SILVER Ion](#) Hydrogen Peroxide Technology infused in the RAA AOL Clean Hand Rub allows it to be used on bacterial and viral disinfecting agent.

Things to take care off

- Store in air tight condition
- Keep away from direct sunlight
